

The next 40 years of Free Software

Nextcloud's Priority Areas to Maximize Impact

🎉 Happy Birthday GNU! 🎉

From the whole Nextcloud community!

I came for the code, but stayed for the freedom

- Discovering GNU/Linux about 1996 as a student
- Quickly get inspired by the Free Software philosophy and the GNU project
- Contributed to many Free Software projects
- And finally found a way to earn my living with Free Software only, by co-founding Nextcloud

✉ bjoern@nextcloud.com

🔗 schlessle.org

Two main parts

- 1) My personal wish and hope for the future
- 2) Give you a idea how Nextcloud contributes to it

The power of positive ideas!

40 years later

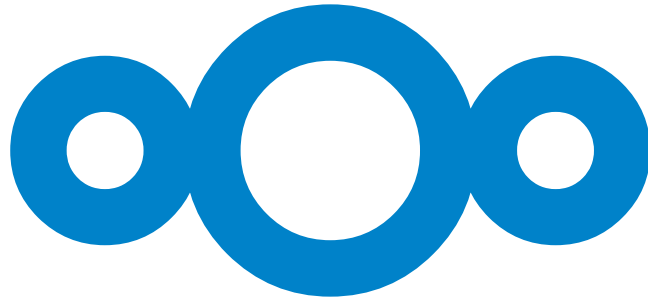

- Many new technology came up... and many more will come
- Often it will be bad for software freedom in the beginning
- But we should **stay the visionaries who make this technology available in a freedom respecting way**

My wish

- Stay the visionary
- Imagine a better digital work
- **And let's us make it happen**
- We shouldn't become grumpy old people who refuse every new stuff and pretend that in the past everything was better

This is exactly what we are trying to do in our field of expertise
[@Nextcloud](#)

Who knows Nextcloud already?

- Exists for 7 years, growing every year
- No external investors
- No hidden agenda (open core, contributor agreement, proprietary „enterprise version“,...)
- 100% Free Software (GNU AGPLv3 / GNU GPLv3)
- Huge community (hundreds of contributors writing their own apps, contribute to the server, translations,...)
- Level playing field which welcome everyone to contribute

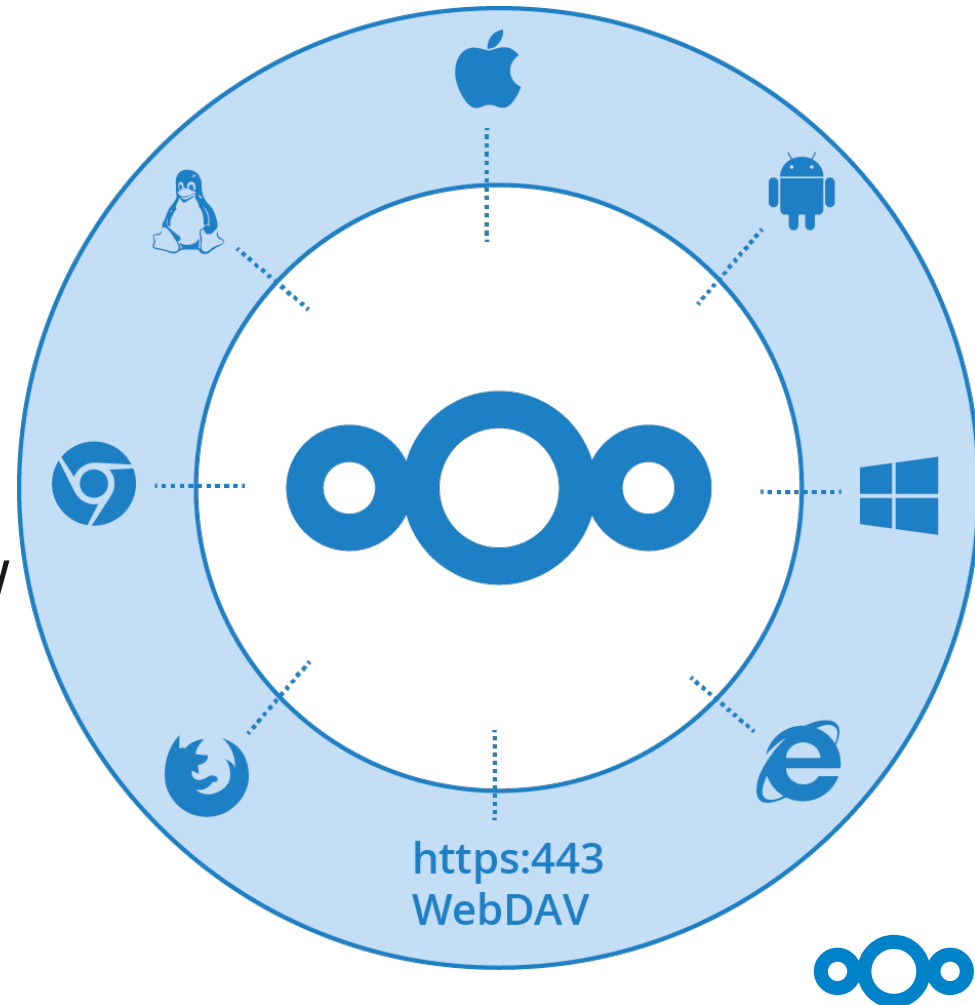

File Sync & Share

(How everything started)

File Sync & Share

- Started at Akademy 2010 by Frank Karlitschek
- Back-then he already saw a move toward the cloud which would have a huge impact how we use computers

Dear Christine and Project Office Team Subrana,

We are reaching out to you today to discuss an important challenge that has emerged in some of our recent projects.

Over the last quarter, we have observed an uncharacteristic trend in the quality standards across various stages of our ongoing projects. Several customers have raised concerns about discrepancies in the final product, and our internal quality control team has identified inconsistencies that we cannot ignore.

The specific challenges include:

- Inaccurate Documentation:** There has been a marked increase in errors within our technical documentation
- Software Performance Issues:** Some end-users have reported occasional glitches and performance problems in the deployed solutions

Organizing a presence at a trade show requires careful planning and attention to detail. Here are five important things not to forget:

- Clear Goals:** Define your objectives and what you want to achieve at the trade show.
- Compelling Booth:** Create an attractive and on-brand booth design that captures attention.
- Pre-Event Promotion:** Promote your participation ahead of time to generate interest.
- Engaging Staff:** Train your team to engage visitors effectively and offer informative interactions.
- Effective Follow-Up:** Have a plan for following up with leads promptly after the event.

These key points will help ensure a successful and impactful presence at the trade show.

I would like to express my very sincerest gratitude for the super excellent support and hard work that went into making our

Summary

- Yes, we can bring software freedom and digital sovereignty to people in 2023 without compromising on functionality
- We at Nextcloud work on it in our field of expertise
- If we all do the same in our areas, the next 40 yeas will be as bright as the past 40 years!

Thanks all of you!

Happy Birthday GNU! 🎉
